**Subject:** Microsoft settlement

Sir,

Microsoft has done nothing wrong. It has EARNED its "monopoly". Nobody has ever been forced to buy Microsoft products; every single one of Microsoft's millions of customers chose to buy them. You can get computers that don't come bundled with MS - I used to use them all the time in my work. If most people prefer computers that do come bundled with MS, that's because Microsoft offers them a value.

If the government of its own country, the freest in the world, continues to victimise it, what hope will Microsoft have in Europe?

Yours truly,  
Valda Redfern
